

BRADKEN

MANUFACTURING FACILITIES

Mackay, QLD

Introduction

Bradken's manufacturing facility in Mackay provides a high quality service to its regional customers. Located in the heart of Mackay's industrial estate, the facility has been specifically designed to handle Dragline Bucket & Rigging Refurbishment, General Engineering, Rail and Mining Bucket Refurbishment and Fabrication. This facility sets the benchmark for sales and service to the mining and construction industry throughout the Mackay region.

The facility strengthens Bradken's position as a world class, cost effective, high quality foundry and heavy engineering company. Bradken has 15 manufacturing facilities, including foundries, heavy engineering workshops and service centres throughout Australia and New Zealand providing the latest technologies and a wealth of technical expertise.

Capabilities

Positioned on 2 hectares, the facility incorporates a wide range of services and comprises 3,000m² of workshop floor space and office space provided sales, distribution and manufacturing all under the one roof.

With the latest technology and equipment, the facility is capable of handling the largest dragline bucket in Australia with a capacity of 121 cubic metres and weighing 95 tonne. Such specialised equipment includes a 100 tonne overhead crane in the bucket workshop and a 20 tonne lifting capacity crane in the main workshop.

Meeting the demands of a high growth region, the facility's warehouse has storing capabilities of over 1,000 tonnes of stock.

Key Features

- 100 tonne Dual Lifting Capacity
- 2177m² Undercover Workshop Space
- Centrally Located in the Bowen Basin Mining Region
- Sales, Distribution and Manufacturing under one roof
