

Industrial

Products and technical support for all types of engineering equipment

Industrial Overview

Bradken Industrial is a leading manufacturer and supplier of cast, forged and fabricated products, mainly consumables, directly to end users for use in process plants or manufacturing processes. The products can vary from products manufactured to the customers' specification, customised products and products based on Bradken's proprietary designs.

Bradken Industrial offers experience in areas such as design, material specification, foundry practices and technical "know how" across a diverse range of products. Bradken Industrial has access to numerous manufacturing sites not only in Australia but also overseas.

Design, Manufacture and Test Facilities

Bradken uses professional staff trained in the latest technology such as:

- Unigraphics
- CAD/CAE/CAM
- Patran Finite Element Analysis,
- AFS Solidification Analysis

linking engineering with manufacturing, and ensuring a strong synergy between the product design process, application requirements and interactions of the customers' operations. This combination of design skills and application expertise guarantees that Bradken products provide superior performance in service and deliver tangible economic benefits to customers at all times.

Superior Quality

As an ISO 9001 approved manufacturer, our mission is to help your company increase efficiency and profitability by providing high quality, technically superior engineered products and support services.

Products and Services

Bradken Industrial offers a range of **CASTINGS** manufactured from most ferrous material grades and specifications. Materials include grey iron, abrasion resistant white iron, mild steel, high alloy steels and duplex stainless steel. Bradken's Industrial business produces castings up to 1,500 kg, utilising fully automated processes, and larger castings up to 21 tonne in iron and 8 tonne in steel. Castings can be supplied in "as cast" condition or fully machined for immediate use.

Bradken Industrial can provide a wide range of **ENGINEERED PRODUCTS** and refurbishment services. Services offered by the group include heavy jobbing fabrication, light production line fabrication, stress relieving capability for all fabricated products, steel grit blasting and painting, machining, horizontal and vertical boring, large gear cutting and cylindrical grinding. Bradken is capable of supplying large machined forgings, castings and fabrications up to 100 tonne.

Industrial Markets Supported

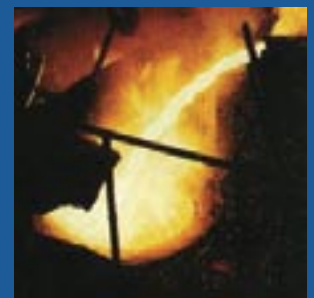

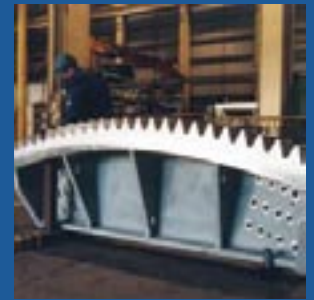

Bradken Industrial offers products to a range of industries including, but not limited to:

- Scrap Processing
- Smelting & Refining
- Transport
- Power Generation
- Mining – OEM, Intermediary & End User
- Steelmaking
- Brickworks
- Sugar
- Cement
- Agriculture

In summary Bradken offers

- Security of supply through an extensive network of foundries and heavy engineering facilities
- Regional service and support
- Technological innovation
- Supply to suit the customers needs
- World best manufacturing technologies
